

## **AVIS DE SÉCURITÉ URGENT** **UTILISATEURS FINAUX**

**Dénomination commerciale :** Tubes rectaux, Drains Unoversal, SimpaVac, Tubes de raccordement d'aspiration stériles, Raccords stériles, Poignées/Sets d'aspiration (FilterFlow™/Deltaflo), Sondes à oxygène, Lunettes à oxygène stériles, Tubes de raccordement à oxygène stériles et Pincés stériles (Voir Annexe 1 pour les détails des produits).

**Date de publication :** 04 Jan 2019

**Référence/RÉF :** Voir Annexe 1

**Identifiant FSCA :** 2018-005 Phase 3

**Type d'action :** Rappel / Mise au rebut de produit

**Adresse e-mail du centre de rappel :** [convatecproductrecall@stericycle.com](mailto:convatecproductrecall@stericycle.com)

**Notez que cette action s'applique exclusivement aux références produit spécifiques et ne concerne pas toutes les références des produits précités.**

---

### **Description du problème :**

ConvaTec a commencé à rappeler de son plein gré les références des produits ci-dessus mentionnés.

Un examen interne de l'intégrité de l'emballage de ces produits a confirmé que ces dispositifs ne remplissaient pas nos critères et ceux de nos clients. Les essais de transport menés sur l'emballage du produit ont échoué confirmant le risque de rupture de la barrière stérile. L'utilisation d'un dispositif non stérile sur le patient peut exposer ce dernier à des agents infectieux et augmenter son risque de développer une infection. ConvaTec n'a reçu aucun rapport d'incidents liés au problème de scellé d'emballage.

### **Description du produit**

Les **tubes rectaux** sont des dispositifs stériles à usage unique insérés dans le rectum pour extraire les selles, réaliser des lavements, administrer un médicament et/ou un fluide dans l'intestin grêle en vue d'une coloscopie et d'une décompression colique.

Les **drains Unoversal** sont destinés à drainer les plaies au moyen d'une faible dépression lorsqu'un saignement postopératoire faible ou modéré est attendu. Ce sont des dispositifs à usage unique réservés à une utilisation de courte durée.

**SimpaVac** est un réservoir destiné au drainage postopératoire de faible dépression des plaies après chirurgie (plaie ouverte).

Les **tubes de raccordement d'aspiration stériles** sont destinés à relier deux dispositifs (par ex. poignées d'aspiration et par réservoir) ou à faire office de rallonge entre un dispositif et une source de vide.

Les **raccords stériles** sont destinés à relier deux dispositifs tels que des poignées d'aspiration et des réservoirs collecteurs.

La **poignée et set d'aspiration (FilterFlow™/Deltaflo)** est un dispositif essentiellement destiné aux chirurgies orthopédiques pour enlever et collecter les débris et les fragments d'os, le ciment, la moelle et les caillots de sang sans obstruer le dispositif d'aspiration, à l'aide d'une combinaison d'aspiration et de filtration.

Les **sondes à oxygène** sont des dispositifs à usage unique destinés à l'oxygénothérapie et à l'administration d'oxygène (en faible concentration) directement par voie nasopharyngée ou nasale.

Les **lunettes à oxygène stériles** sont destinées à l'administration directe de faibles concentrations d'oxygène par voie binasale.

Les **tubes de raccordement à oxygène stériles** sont destinés à l'administration de concentrations basses/modérées d'oxygène. Les tubes de connexion/rallonge délivrent l'oxygène à partir d'une unité fixe ou mobile au patient via un dispositif d'administration. Les dispositifs d'administration incluent, entre autres, sondes à oxygène, lunettes et masques à oxygène. En cas d'utilisation de tubes de connexion/rallonge entre les dispositifs de distribution et l'unité d'approvisionnement, le patient est plus libre de ses mouvements et le flux d'oxygène est ininterrompu.

**Pinces stériles** : Il s'agit d'une pince à usage unique destinée à plusieurs applications. Utilisée dans les procédures cliniques pour saisir, manipuler, manœuvrer ou assister à l'élimination de débris, particules ou tissus de plaies.

#### **Procédure d'identification du produit :**

Seuls les codes produits et lots correspondants stipulés dans cet avis présentent un risque de rupture de l'emballage à barrière stérile.

Par conséquent, et pour contrer tout risque potentiel de danger, tous les produits concernés **ne doivent** pas être utilisés.

La seule manière d'identifier le produit affecté est de comparer la référence produit et le numéro de lot des produits faisant l'objet d'un rappel (voir Annexe 1). Il n'y a pas de différence visible entre un produit concerné et non concerné.

Reportez-vous à l'Annexe 2 pour avoir un exemple d'étiquetage indiquant l'emplacement de la référence produit et le numéro de lot sur les étiquettes des dispositifs. Celles-ci se trouvent sur l'emballage primaire et sur la boîte de transport. La référence produit (code) est précédée de la mention « REF » et le numéro de lot

est précédé du symbole

**Conseil sur les mesures à prendre par l'utilisateur final.**

Nos dossiers indiquent que vous avez reçu des produits concernés. Merci de suivre les étapes suivantes :

1. Cessez d'utiliser tous les dispositifs concernés, définis dans le présent document.
2. Vérifiez le stock et veillez à mettre tous les dispositifs concernés en quarantaine.
3. Complétez le « Formulaire de réponse au rappel à l'attention des UTILISATEURS FINAUX » et renvoyez-le à  **votre distributeur dès que possible.**
4. Contactez votre distributeur (et non ConvaTec ou le centre de rappel) pour organiser le retour des produits concernés, le cas échéant, et organiser votre remboursement. **Pour obtenir des produits de rechange, veuillez passer une nouvelle commande auprès de votre distributeur en suivant la procédure habituelle.**

**MERCI DE RENVoyer LE FORMULAIRE DE RÉPONSE REMPLI DÈS QUE POSSIBLE.**

Continuez de déclarer toute information autre que le présent rappel, telle que les événements indésirables associés aux produits, via votre distributeur ou la ligne d'assistance client de **ConvaTec (reportez-vous à la liste des contacts régionaux pour plus de détails).**

**Transmission de cet Avis de sécurité :**

Le présent avis doit être envoyé à toutes les autres personnes ayant reçu les dispositifs concernés au sein de votre organisation ou à toute organisation où ont été transférés les dispositifs concernés.

Chez ConvaTec, nous nous engageons à fournir des produits et des services de qualité à nos clients et nous vous prions de nous excuser pour la gêne occasionnée par cet avis.

Si vous avez des questions concernant ce rappel, veuillez contacter le centre de rappel. Si vous avez besoin d'aide, veuillez contacter votre distributeur ou votre représentant ConvaTec local. Reportez-vous à la liste des contacts pour obtenir les **coordonnées régionales de ConvaTec.**

Les autorités nationales compétentes ont été avisées de cette action corrective de sécurité.
