URGENT: FIELD SAFETY NOTICE - MMS-20-3956

BD Alaris™ GW and GW800 Volumetric Pumps

Product Codes: Refer to Appendix 1

Type of Action: Advisory

Attention: EBME / Clinical Engineering Managers, Clinical Personnel, Risk Managers

This letter contains important information which requires your attention.

Dear Customer,

BD is issuing this Field Safety Notice for the **Alaris™ GW and GW800 Volumetric Pumps**. Our distribution records indicate that your organisation may have received impacted instruments.

Description of the Problem

BD is updating the Directions for Use to include additional warnings relating to the use of non-dedicated/non-compatible administration sets to mitigate against unregulated flow during infusion. BD has received customer feedback associated with unregulated flow as a result of the use of non-dedicated/non-compatible administration sets.

These additional warnings will be included in future shipments of the BD Alaris™ GW800 Volumetric Pumps. The BD Alaris™ GW Volumetric Pumps are no longer manufactured or distributed but they may still be in clinical use and therefore these additional warnings should be applied.

Additional Warnings to be followed for BD Alaris™ GW and GW800 Volumetric Pumps:

- Administration sets which do not contain anti-siphon valves or free flow protection should not be used
 to deliver high risk medications or used on vulnerable patients. The use of sets without free flow
 protection can lead to unregulated flow, which could cause harm to the patient.
 With set detection mode disabled always use a flow sensor.
- Always use the IVAC® Model 180 Flow Sensor when using sets without anti-siphon valves or whenever the Pump set detection mode is disabled. The flow sensor automatically monitors the infusion flow rate through the drip chamber and will cause the Pump to alarm if a significant deviation from the infusion rate occurs. The flow sensor will detect empty containers.

Appendix I of this Field Safety Notice contains the list of product codes (REFs) for the BD Alaris™ GW and GW800 Volumetric Pumps under scope. The product codes are affixed to the bottom of the pump per the sample photo contained in Appendix II.

Advice on actions to be taken by the user

- Ensure the contents of this Field Safety Notice including the additional warnings are read and understood by those within your organisation who may use the BD Alaris™ GW and GW800 Volumetric Pumps.
 - If you have further distributed the product to other organisations, please identify those organisations and notify them at once of this Field Action.

EMEAFA088 Revision 1 Page 1 of 5

www.BD.com

- Please complete the Customer Response form (Page 3) and return the completed form to BD at <<insert email address>> no later than November 30th, 2020.
- 3. If you are no longer in possession of or no longer use the instruments listed in Appendix 1, please indicate this on the response form and return to BD so we may update our records.

Should you have any questions or experience any issues associated with the product or issue described in this Field Safety Notice, please contact your local BD representative. We confirm that the appropriate regulatory agencies have been informed of these actions.

BD is committed to ensuring that safe and effective product is available to customers and this Field Safety Notice is taken with due consideration of this commitment.

Thank you for your attention and cooperation.

Yours sincerely,

William David

Senior Director Quality Compliance EMEA
