

Avviso urgente di sicurezza

Potenziale prematuro esaurimento della batteria in un sottogruppo di dispositivi ICD e CRT-D

Riferimento BIOTRONIK: BIO-LQC

Berlino, marzo 2021

Gentile Dottoressa, Egregio Dottore,

BIOTRONIK è venuta a conoscenza di un aumento della probabilità di esaurimento prematuro della batteria in un sottogruppo dei seguenti modelli di defibrillatori cardiaci impiantabili ("ICD") e defibrillatori per terapia di resincronizzazione cardiaca ("CRT-D").

ICD e CRT-D Idova, Iforia, Ilesto/Inventra, Iperia,
Itrevia/Ilivia, Inlexa, Intica/Ilivia Neo, Intica Neo

Questi dispositivi sono stati distribuiti dal 2013. Non tutti i dispositivi dei suddetti modelli sono interessati, né lo sono altre famiglie di ICD o CRT-D.

Non abbiamo ricevuto segnalazioni di lesioni gravi o decessi associati a questo problema. Ad oggi tutte le segnalazioni descrivono dispositivi che non hanno fornito la longevità attesa, richiedendone la sostituzione anticipata rispetto a quanto previsto.

Motivo della presente comunicazione

L'attuale tasso osservato di eventi confermati di esaurimento prematuro della batteria corrisponde allo 0,1% di tutti i dispositivi suscettibili di questo problema. Poiché potrebbero non essere stati segnalati a BIOTRONIK tutti i casi di esaurimento della batteria, il numero esatto di dispositivi che hanno manifestato questo problema non è del tutto noto. BIOTRONIK stima che il numero di dispositivi impiantabili potenzialmente interessati da tale problema sia di circa 162.000 in tutto il mondo.

Le analisi dei dispositivi restituiti hanno rilevato la possibilità che si verifichi una certa modalità di deposizione di litio sugli anodi delle batterie, nota come placcatura del litio. La placcatura del litio è un fenomeno molto raro che può causare un esaurimento della batteria a una velocità superiore rispetto alle tipiche condizioni d'utilizzo.

L'insorgenza osservata per i dispositivi che presentano tale problema è a circa 2 anni dall'impianto con un tasso di guasto dello 0,0012%. Il tasso di guasto previsto a 5 anni dall'impianto è stimato pari allo 0,17%.

Rischio per la salute

Il rischio che l'esaurimento prematuro della batteria comporti un'improvvisa perdita della terapia ad alta tensione o di stimolazione è molto basso. Le analisi dei dispositivi restituiti indicano che il rischio di perdita della terapia ad alta tensione è dello 0,0069%, mentre il rischio di perdita della terapia di stimolazione è dello 0,0015% su base mensile.

A causa del problema identificato, l'intervallo tra l'attivazione dell'indicazione di sostituzione elettiva ("ERI") e la perdita della capacità di fornire la terapia potrebbe essere inferiore rispetto al previsto. I dati in nostro possesso indicano che, per i dispositivi interessati, l'intervallo mediano dall'ERI alla perdita della terapia ad alta tensione è stato di 58 giorni. L'intervallo mediano fino alla perdita della terapia di stimolazione è risultato di 6 mesi.

Rilevamento precoce del guasto della batteria

Il programmatore e il sistema Home Monitoring di BIOTRONIK sono dotati, da progettazione, di una funzione di rilevamento dell'esaurimento della batteria. Questa funzione consente di rilevare precocemente un esaurimento della batteria, incluso un esaurimento prematuro, e di visualizzarlo mediante un avviso di ERI durante il follow-up in ambulatorio o tramite il monitoraggio remoto giornaliero utilizzando BIOTRONIK Home Monitoring.

Raccomandazioni per la gestione del paziente

A seguito di una consultazione con il nostro Medical Advisory Board, BIOTRONIK Le raccomanda di considerare le seguenti opzioni di gestione:

- **Dispositivi in magazzino:** Non impiantare dispositivi potenzialmente interessati, che comprendono tutti i modelli identificati nella presente comunicazione. I dispositivi interessati presenti nell'inventario ospedaliero verranno sostituiti da parte di rappresentanti locali di BIOTRONIK.
- **Proseguire con la programmazione standard di follow-up del paziente.**
 - **Durante il follow-up:** Verificare lo stato del dispositivo e della batteria durante il follow-up in ambulatorio o con Home Monitoring. La preghiamo di prestare attenzione ai dispositivi che non rispondono o che non trasmettono i dati in quanto potrebbero presentare questo problema; il rappresentante BIOTRONIK dovrebbe essere informato qualora si osservi un comportamento insolito del dispositivo.
 - **Home Monitoring dovrebbe essere utilizzato ogniqualvolta sia possibile, in quanto fornisce allarmi ERI tempestivi per ridurre il rischio di improvvisa perdita della terapia.**

Qualora ancora non utilizzi l'Home Monitoring, valuti se questa opzione sia appropriata per lei e i suoi pazienti. BIOTRONIK fornirà gratuitamente i dispositivi CardioMessenger per monitorare i dispositivi impiantabili interessati da questo avviso.

Qualora desideri registrarsi per Home Monitoring, contatti il rappresentante locale di BIOTRONIK. Visiti inoltre www.biotronik.com/en-de/products/home-monitoring per ulteriori informazioni su Home Monitoring e su come può aiutarla con il monitoraggio remoto dei suoi pazienti nella pratica quotidiana.

- **In caso di allarme ERI imprevisto** per un dispositivo interessato da questo avviso, si dovrà considerare una sostituzione tempestiva in base alle condizioni di base del paziente:
 - Per i pazienti non dipendenti da pacemaker o con ICD in prevenzione primaria, si consiglia la sostituzione del dispositivo entro una settimana dall'allarme ERI.
 - Per i pazienti dipendenti da pacemaker, si consiglia la sostituzione immediata del dispositivo a seguito dell'allarme ERI.

In accordo con il proprio Medical Advisory Board, BIOTRONIK **non consiglia la sostituzione profilattica**. Il rischio di complicanze per la sostituzione dell'ICD¹⁻³ supera il rischio associato a questa problematica. Si rimanda alle suddette raccomandazioni di gestione del paziente qualora si osservi un'indicazione di ERI imprevisto.

Riconosciamo che ogni singolo paziente abbia esigenze cliniche specifiche. In ultima analisi, pertanto, è il giudizio clinico del medico, basato sulle specifiche condizioni del singolo paziente, che determina la decisione finale sulla cura del paziente e sulla frequenza delle sessioni di follow-up.

Ulteriori misure previste

BIOTRONIK sta lavorando ad un aggiornamento del software che riduca le probabilità delle batterie di sviluppare tale forma di placatura del litio e possa pertanto attenuare il rischio di esaurimento prematuro della batteria. Si prevede che questo aggiornamento sarà disponibile con il prossimo aggiornamento del software, che sarà rilasciato a breve, una volta completata l'approvazione normativa.

Ulteriori informazioni

- In caso di domande o dubbi, contatti il nostro rappresentante locale BIOTRONIK o l'assistenza tecnica regionale BIOTRONIK, facendo riferimento alla seguente tabella:

Regione	Telefono	E-mail
Europe, Middle East, Africa	+49 (0) 30 68905 2200	technical.services@biotronik.de
North America	+1 (800) 547 0394	advancedproductsupport@biotronik.com
South & Latin America	+55 11 97663 8135	caio.vinha@biotronik.com
Asia Pacific	+64 21 2809 200	technical.services.ap@biotronik.com

- I dati in possesso di BIOTRONIK indicano che uno o più dei suoi pazienti potrebbe avere un dispositivo interessato dal problema. E' possibile stabilire se un dispositivo specifico è interessato da questa azione correttiva al seguente indirizzo internet www.biotronik.com/devicelookup.
- La preghiamo di assicurarsi che tutte le pertinenti figure sanitarie della sua organizzazione siano a conoscenza di questo avviso urgente di sicurezza sul campo.
- La informiamo che l'Autorità Competente locale è stata messa al corrente della presente azione correttiva di sicurezza sul campo.
- La preghiamo di compilare il Modulo di Conferma del Cliente fornito con questa comunicazione e di restituirlo come indicato sul modulo, al fine di soddisfare i requisiti normativi.

Per BIOTRONIK, la sicurezza del paziente rimane la priorità assoluta. Siamo spiacenti per le eventuali ripercussioni di tale problema su Lei e i Suoi pazienti. La ringraziamo per il supporto e la continua collaborazione.

Distinti saluti

Stephan Schwerzel
Senior Director Quality Assurance CRM
Medical Device Safety Officer

Roman Borkowski
Senior Vice President Quality Management &
Regulatory Affairs CRM
