2. Reason for Field Safety Corrective Action (FSCA)*

2. 1. Description of the product problem*

The mechanism of the listed article number operates in a way that the tube within detaches during the removal process. If the tube is not precisely fixed, part of the tube may stretch out from the opening after detachment and fall into the abdomen of the patient.

2. 2. Hazard giving rise to the FSCA*

The reported incidence is potentially serious to patients as the extending part may fall into the cavity

2. 3. Probability of problem arising

Overall occurrence rate: within 0.0001

2. 4. Predicted risk to patient/users

Prolonged surgery or surgical intervention

2.	5. Background on Issue
	The device is used to contain and remove specimen removed during laparoscopic surgery. The mechanism of the listed article number operates in a way that the tube within detaches during the removal process. If the tube is not precisely fixed, part of the tube may stretch out from the opening after detachment and fall into the abdomen of the patient. It was thus decided to proceed with a field safety corrective action to replace the current version with an improved design variant thus reducing the potential for the tube stretching out / falling into the patients abdomen.

	3. Type of Action to mitigate the risk*	
3.	**1. Action To Be Taken by the User***	
	☒ Identify Device ☒ Quarantine Device ☐ Return Device ☒ Destroy Device ☐ On-site device modification / inspection ☐ Follow patient management recommendations ☐ Take note of amendment / reinforcement of Instructions For Use (IFU) ☐ Other ☐ None	
3.	2. By when should the action be completed?	Estimated within 6 months
3.	3. Is customer Reply Required? * (If yes, form attached specifying deadline for return)	Yes
